

# ZYKOVA TETIANA

## JUNIOR FRONT-END DEVELOPER

### SUMMARY

I am a Front-End developer looking for a full-time position in IT company. It is important for me that the team wants to move forward, mutual understanding and respect.

I like to develop my skills and learn something new, work with information and deal with complexities. It's very cool to see the result of my work, I want to benefit society, make people's lives easier and more convenient. I'm an energetic and hard-working person. I love to play shooters and I know how important teamwork is to achieve the goal. But just like fishing, it is important to be very attentive to details and appreciate the time.

### PROJECTS

**Phonebook** repository: [github.com/files](https://github.com/files) demo: [github.com/phonebook](https://github.com/phonebook)  
[react hooks, redux toolkit, thunk, router 5, flux, mui, js es6+, ajax, rest api, loader, persist, git]  
Stores all your contacts in one place. Comfortable adding and searching by contacts.

**Gallery** repository: [github.com/files](https://github.com/files) demo: [github.com/gallery](https://github.com/gallery)  
[react hooks, flux, js es6+, ajax, rest api, loader, toastify, html, responsible css, bem, git]  
A site with a convenient and comfortable search for images by keyword.

**Webstudio** repository: [github.com/files](https://github.com/files) demo: [github.com/webstudio](https://github.com/webstudio)  
[semantic html, accessibility, sass, adaptive/responsible css, bem, git]  
The landing site of the web studio.

### TEAM PROJECTS

**Kapusta** repository: [github.com/files](https://github.com/files) demo: [github.com/kapusta](https://github.com/kapusta)  
[react hooks, redux toolkit, thunk, router 6, flux, mui, js es6+, ajax, rest api, axios, react-datepicker, persist, git]  
Maintaining user transactions (income, expenses) and their graphical display.  
I was responsible for the transaction page (income and expense pages), processing user data (user in the redux store), filling out the transaction form, then rendering up-to-date information in the daily data table and monthly summary, styling. Routing on router 6. Implemented calculator logic. Calendar using the react-datepicker library. Helped with registration and login.

**Filmoteka** repository: [github.com/files](https://github.com/files) demo: [github.com/cinema-library](https://github.com/cinema-library)  
[js es6+, ajax, rest api, html, basiclightbox, babel, adaptive/responsible css, sass, bem, notiflix]  
Site for finding movies and adding to your library.  
I was responsible for modal windows with movie information and trailer display by clicking on the picture (another modal window with basiclightbox library). I used an API to render film data. I write the processed data to local storage to render personal library. Add window with user-info.

**Ice-creame** repository: [github.com/files](https://github.com/files) demo: [github.com/ice-creame](https://github.com/ice-creame)  
[html, handlebars, accessibility, babel, sass, adaptive/responsible css, bem, git, gitflow]

The landing site of the ice-creame.  
I was responsible for the product section and the site footer. Scrollbar.
